**General Information:**

- Stick NO ENTRY signs on every theatre door to avoid reducing positive theatre pressure
- Ensure that trolley is within the laminar flow enclosure while opening TRAYS and CONSUMABLES, cover after layout
- Don't allow patient to enter theatre until set up done
- Ensure RUNNER avoids going within the laminar flow enclosure after layout to reduce dust after anaesthetic set up
- Yellow bin should be lined with yellow bag for shaving if necessary
- Mr Hardy to supervise tourniquet and posts
- Mr. Hardy will prep patient's foot first with Alcoholic Betadine. 8 ½ glove for the patient's foot and prep the rest of the limb to the tourniquet cover
- Impervious split U sheet, then Vernaid stockinette and then Orthopaedic U and other drapes. Scissors to expose betadine covered knee. Carefully clean skin over knee with alcoholic pink Chlorhexidine before drying skin and sticking the Barrier Flex clear film to the skin
